**Re Item V.**

- 1 The following document is referred to in this communication:  
D1 : WO 96/23840 A (ELF-ATOCHEM) 8 August 1996 (1996-08-08)

**2 Novelty**

2.1 None of the documents of the prior art disclose all the features of the present application. The subject matter of the claims of the present application appears to be new according to Article 33 (2) PCT.

**3 Inventive Step**

3.1 D1 (the references in parenthesis applying to this document) is considered to be the closest prior art, because it deals with epoxy resin-asphalt compositions. Example 7 describes an asphalt-epoxy resin composition containing maleic anhydride grafted polypropylene (as component E). On page 4, lines 18 and 19 of D1 the skilled person is advised to use up to 10 parts (of component E) on 100 parts asphalt. Since no surprising technical effect has been identified by the applicant, the present claimed range appears to be little more than an arbitrary selection from the subject matter of D1. Hence, the subject matter of present claim 1 does not appear to involve an inventive step according to Article 33 (3) PCT.

3.2 The subject matter of claims 2-9 would appear little more than normal procedural variations obvious to the skilled person in the field of asphalt compositions. Therefore the subject matter of said claims do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step(Article 33(2) and (3) PCT).
